

APES Ch. 10-11 Multiple Choice Test Hints

Ch. 10 – Biodiversity

biodiversity
Biodiversity Treaty (Convention on Biological Diversity)
biota
Convention on International Trade in Endangered Species (CITES), 1973
cultivated plants and animals – characteristics vs. their wild counterparts
endangered species – approx. how many documented in U.S.
Endangered Species Act (ESA) of 1973
endocrine disruptors
ethnobotany
extinction rates

fragmentation
game animals
instrumental value
intrinsic value
keystone species
Lacey Act of 1900
limiting factors – density-dependent, density-independent
Marine Mammal Protection Act (MMPA) of 1972
peregrine falcon
poaching
propagated cultivars
xeriscaping

Ch. 11 – Ecosystem Capital

aquaculture
biomes: desert, grassland, forests, tundra, etc.
carrying capacity
clear cutting
conservation
coral reefs
deforestation
extractive reserves
International Whaling Commission (IWC)
mangroves
marine fisheries
maximum sustainable yield
natural capital

natural goods
natural parks
natural services
Natural Wildlife Refuges
overfishing
preservation
public lands in U.S.
rainforest deforestation
sustainable forest use
total allowable catch (TAC)
“tragedy of the commons”
wetlands
wilderness
