

Dear Parents and Guardians,

Semester 2

My name is Lori Bauck, and I teach AP Environmental Science and Chemistry at PHUHS. I am a teacher in the Center for Wellness and Medical Professions program. Teaching is my profession and my calling, and I am thrilled to continue over 20 years of service to inspire and challenge the young minds which will shape our future.

You are receiving this letter because

- 1) your son/daughter is a new student to my class this semester
- 2) I do not have an email address registered from last semester, OR
- 3) the email address I have on file is incorrect or no longer active.

Communication between school and home is an integral part of the education system. As a new school year begins, I encourage you to join the Bauck Email Network (B.E.N.). Updates and reminders are emailed each week to parents/guardians and students. We have had as high as a 99% participation rate in my email network.

My school email address is BAUCKL@pcsb.org. Please save my email address as “safe,” as the weekly B.E.N. emails are mass-mailings.

In an effort increase the availability of information, I have a web domain at www.kwanga.net: Know What’s Absolutely Necessary to Get Ahead. Course information, lesson plans, student award winners, links for practice and enrichment, and other items of interest are uploaded. The site is updated weekly.

My grade book will be viewable through Portal. Please check grades on a regular basis.

Please fill out the bottom portion of this letter to return to school. If you have been a B.E.N. member from another course, please take the time to fill out this form for my updated records, and welcome back.

Yours for Better Education,

Lori Bauck

National Board Certified Teacher – Adolescent and Young Adulthood Science (Chemistry)

CUT and RETURN bottom portion to Mrs. Bauck.
